

AQUANAUTIC DAHAB

A HOME UNDERWATER DIVE RESORT

Saudi-Arabia

The Islands

Offering a wide range of hard and soft coral, combined with outstanding topography, our house reef is one of the most beautiful reefs of Dahab.

Lighthouse north

The reef wall is scattered over numerous sandy patches with enormous pinnacles rising from all directions, which disappear into the deep.

Eel Garden

Countless garden eels looking out of their hiding places, rocking in the soft current. Watching these animals makes this spot so exceptional.

Ras Abu Helal

Misam, 'Headland of the Crescent Moon' and refers to the shape of the reef. The dive can only be done at high tide in perfect conditions. The corals are in a pristine state and cover the seabed as far as the eye can see.

Blue Hole

One of the most famous dive sites in the Red Sea is convincing with immersion into the deep blue and pulsating life along the steep face.

Canyon

Light is coming through the crack while you sit in semi-darkness surrounded by schools of fish. Not only the Canyon itself but the coral garden around the entrance makes this divespot unique.

Ras Abu Galum

The Camel Safari to Ras Abu Galum is a unique opportunity to experience the desert like a Bedouin, on the back of a camel. You get to enjoy stunning views along the way before you dive into the fantastic underwater world. Big schools of reef fish and colorful Coral Gardens are waiting for you.

Hidden Islands

Napoleon Reef

Lagoon

Between a sandy area and a huge sea grass meadow, where you can find seahorses, morays and all kinds of nudibranch, there is one pinnacle, like an oasis in a desert, brimming with life.

Seven Pinnacles

Golden Blocks

A mixture of coral gardens and sandy areas with almost all coral species represented, this spot is exciting to look at, while relaxing in the current, drifting to Moray Garden.

Moray Garden

A never ending abundance of stony coral, including yellow waver and raspberry coral is waiting for you.

The Caves

are shallow underwater overhangs that are thrilling to explore. You can watch the light shine through the swarms of anthias and bannerfish swimming upside down on the ceiling of the cave.

Turtle Highway

Umm Sid

Umm Sid features abundant fish life and a variety of reef structures which are all in exceptional condition as the site was not dived as frequently in the past as others in Dahab. Dive through a garden of table corals and look out for the big gorgonia at the beginning of the dive.
